ANDOFLEX™ COMPRESSION

AndoFlex™ is a **zinc**- and **calamine-infused** two-step compression bandage, known for **soothing skin**, managing oedema, staying secure and providing **comfort** for up to seven days.

Areas for use:

- Chronic irritation from venous hypertension
- Eczema
- Contact dermatitis
- Other related conditions

KEY FEATURES COMPARISON

	ANDOFLEX	OTHER COMPRESSION BANDAGES
Itch reduction	✓	✗
Malodour control	✓	✗
Consistent compression	✓	✗
Patient comfort	✓	✗
Accelerated healing	✓	✗
Easy application	✓	✗
Latex free	✓	✗

Zinc & Calamine

AndoFlex™ combines 15% Zinc & 3% Calamine for better healing and comfort.

Zero hassle

Patients can wear usual footwear and clothing, stress-free...

7-Days Wear

Increased wear time, supporting a lower overall cost of treatment.

Why It Matters for the NHS
Efficient use of NHS resources through reduced dressing changes and lower overall treatment burden.
