DEBRICHEM®

Debrichem® is an innovative topical dehydrating agent designed to remove infection and biofilm in hard-to-heal wounds, with **one single 60-second application.**

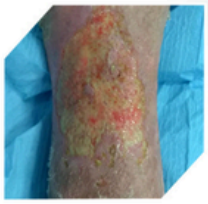
Areas for use:

- Diabetic Foot Ulcers
- Venous Leg Ulcers
- Pressure Ulcers
- Vasculitis Ulcers
- Post-Surgical Ulcers
- Post-Traumatic Ulcers
- Arterial Ulcers

When to consider Debrichem®

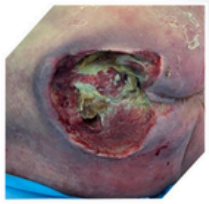
Debrichem® can be used by all healthcare professionals, in particular wound care specialists, nurses, surgeons, diabetic foot ulcer specialists and vulnologists, to treat **all non-surgical hard-to-heal wounds such as:**

Diabetic Foot Ulcers



Venous Ulcers

Post-traumatic skin ulcers



Pressure ulcers

How Debrichem® works

DEBRICHEM® desiccates the biofilm, as well as the residing and planktonic micro-organisms within 60 seconds of application.

By instantly capturing water molecules from any type of exposed biological material, **DEBRICHEM®** has an immediate dehydrating effect, with no damage to the vital tissue below the wound bed.

WHY DEBRICHEM® IS SAFE ON HEALTHY SKIN
Healthy skin has a lower water content, protecting it from DEBRICHEM®'s desiccation effect.

COST-EFFICIENT SOLUTION
DEBRICHEM® is 57% more cost-effective than standard wound care, with potential healthcare savings.

WHY DEBRICHEM® TARGETS BIOFILM
Biofilm contains 97% water, making it susceptible to DEBRICHEM®'s desiccation effect.

How to Apply DEBRICHEM®

1. PREPARE
Protect, position and clean the wound. Shake and open DEBRICHEM®.

2. APPLY
Cover the wound with DEBRICHEM® and spread evenly. **Leave for maximum 60 seconds.**

3. RINSE & DRESS
Rinse thoroughly with saline, remove debris, dry and apply the appropriate dressing.

What they say...

"Some infected wounds are difficult to debride without taking the patient to the OR. Where there is exuberant lumpy bumpy irregular granulation tissue for example. In my experience one application of DEBRICHEM® will completely solve that problem. By the next week you will be left with a perfectly healthy wound bed."

Professor Steven Jeffery
Medical Director, Pioneer Sussex Wound Healing and Lymphoedema Centres
