KYTOCEL™ DRESSINGS

Powered by acylated chitosan, **KytoCel™** is the gelling fibre dressing that takes command of moderately to heavily exuding wounds— gelling fast for confident exudate management.

Areas for use:

- Leg ulcers
- Pressure ulcers
- Surgical wounds
- Traumatic wounds
- Diabetic foot ulcers
- Burn wounds
- Donor sites
- Abrasions
- Lacerations
- Post-op wounds

KEY FEATURES COMPARISON

	KYTOCEL	OTHER DRESSINGS
Accelerates healing	✓	✗
Stimulates immune response	✓	✗
Is antimicrobial (bacteriostatic and fungistatic)	✓	✗
Is haemostatic	✓	✗
Non-toxic	✓	✗
Absorptive	✓	✗
Biocompatible and biodegradable	✓	✗

Easy & Comfortable

Gel forms on contact with wound exudate, preventing sticking and allowing easy, pain-free removal.

Binds & Protects

Pathogens are bound, reducing bioburden and contamination risk at dressing change.

Nature's Gift

KytoCel's natural, biodegradable chitosan fibres enable optimal wound exudate management.

Why It Matters for the NHS
Combines advanced infection control and exudate management to support efficient NHS care pathways.
